GEORGE A. MITCHELL COMPANY
“Tube Forming Specialists”

**Two Station Tube End Forming Machine
For Monotube Shock Absorber
Mitchell Serial No. PP-579**

The above tube forming machine forms the counterbore on the end of the Monotube Shock Absorber Tube body, utilized in many of today's automobiles and SUVs. The unit is capable of processing over one million monotubes shock bodies per year.

Mitchell's past involvement with Shock Absorber Tubes includes cold forming of I.D. threads in a McPherson Strut Reservoir Tubes design for a major OEM shock absorber manufacturer in North America. The cold forming of the I.D. threads was accomplished without producing metal chips.

For information on innovative cold forming techniques for your application, please contact us.
